SaaS BACKUP AND RECOVERY

So you never lose what matters most...

Protect your data from accidental loss, ransomware, and disasters, and bounce back fast.

What Is Backup and Recovery?

Our Backup and Recovery service securely stores your business-critical data off-site and in the cloud, giving you full peace of mind. Whether it's an accidental deletion, hardware failure, cyber-attack or a natural disaster, we help you recover fast with minimal disruption.
We protect your email, files, servers and cloud apps with secure, encrypted backups and rapid recovery tools, managed by our expert support team.

Why It Matters

Business Continuity
Quick recovery means minimal downtime. Your business stays operational even if the worst happens.

Ransomware Protection
Don't pay the price. We keep secure, versioned copies of your data, making it easy to recover after a ransomware attack.

Meets Compliance Standards
Support for GDPR, ISO 27001, and other regulations with reliable data retention and reporting policies.

What We Back Up

- Microsoft 365 (Outlook, OneDrive, SharePoint, Teams)
- Servers and virtual machines
- Local file systems and devices
- Cloud storage
- System images for full-device restoration

What You Receive

- Automated daily backups
- 24/7 monitoring and recovery support
- Cloud and off-site storage with UK data centres
- Regular restore testing
- Fast restore options, from single files to full systems

Who Is Marshall?

Marshall has supported creative businesses since 2009, combining strong cybersecurity with smart, flexible tech for modern teams.
